

HIPAA COMPLIANCE HEALTHCARE INDUSTRY CASE STUDY

OBJECTIVES

- To provide Healthcare Provider A's employees with adequate security awareness training
- To help Healthcare Provider A recognize and avoid phishing emails
- To ensure that Healthcare Provider A's employees remain vigilant against cyber threats

"Our mission is to help our clients navigate the complex landscape of cybersecurity and information compliance, particularly in high-regulatory environments like healthcare, finance, and Federal/DOD contracting. We understand that the stakes are high when it comes to protecting sensitive data, and we're committed to providing the expertise and support our clients need to achieve and maintain compliance."

CARL B. JOHNSON

PRESIDENT, CLEARED SYSTEMS

BACKGROUND

Healthcare Provider A experienced a data breach due to an employee falling victim to a phishing email. They lacked adequate security awareness training for their employees.

SOLUTIONS

Cleared Systems conducted a HIPAA risk analysis and found that the organization did not have adequate security awareness training for its employees. To address this issue, Cleared Systems developed and delivered a customized training program for Healthcare Provider A that included simulated phishing exercises to help employees recognize and avoid phishing emails. Cleared Systems also provided ongoing training and support to ensure that Healthcare Provider A's employees remained vigilant against cyber threats.

BENEFITS

Improved Security Posture

Healthcare Provider A is better protected against cyber threats as a result of the customized security awareness training provided by Cleared Systems.

Increased Awareness

Healthcare Provider A's employees are more aware of potential cyber threats and are better equipped to recognize and avoid phishing emails.

Protection of Sensitive Data

Healthcare Provider A's sensitive data is better protected against potential data breaches as a result of the improved security posture.
